Chinese (Native C2), English (Proficient C1), German (Conversational B2)

Profile

I am a 5G/6G standards researcher with extensive experience in 3GPP system architecture and security SA2, SA3, and SA4. I lead two research teams on IP Multimedia Subsystem (IMS) Evolution and 6G Data Framework Security, where I define standardization strategies, drive intellectual property creation, coordinate cross-working-group alignment, and plan and author technical documents (tdocs) for 3GPP standardization. I also serve as a delegate in SA3, focusing on Data Framework Security. I have published numerous scientific articles and filed over 50 patents, and I actively serve as reviewer and editorial board member for respected journals and conferences in telecommunications. For the latest details, please visit to my personal website at <https://huanzhuowu.github.io> or scan the QR code in the footer.

Work Experience

Nokia

Munich, Germany

SENIOR RESEARCH SPECIALIST

Jan. 2023 - Present

Focus areas: 5G-Advanced & 6G research, 3GPP system architecture, IMS evolution, 6G Data Framework Security, edge computing and future network architecture

- Lead two research teams on IMS and 6G Data Framework Security, defining long-term standardization strategies across SA2 and SA3
- Drive intellectual property creation and standards positioning by identifying innovation opportunities, coordinating patent generation, and aligning 3GPP contributions with protected intellectual property
- Contribute to and author 3GPP technical documents (tdocs), supporting Nokia delegates in SA2, SA3 and SA4 meetings and delegating the company in SA3 security activities
- Coordinate cross-functional collaboration among research, standards and product teams to build consensus and advance key study and work items
- Recipient of Nokia's Outstanding Leadership Award and repeatedly recognized by research leadership and the delegation leads for exceptional contributions

Technische Universität Dresden (TU Dresden)

Dresden, Germany

JUNIOR RESEARCHER

Feb. 2017 - Dec. 2022

Research areas: In-network Computing, SDN, AI/ML, edge computing

- Conducted research on in-network computing and AI/ML using scikit-learn, PyTorch, Mininet, Ryu, and Open vSwitch SDN frameworks, with publications, talks, and exhibitions on e.g., IEEE GlobeCom, IEEE ICC, IEEE Internet of Things Journal, CES, and Hanover Messe
- Coordinated and managed funded research projects with industry partners and research institutions, overseeing the entire lifecycle from proposal writing to final project outcome delivery
- Published 20+ high-quality scientific articles in leading journals and conferences
- Successfully applied for and secured approx. €900k in external project funding
- Delivered lectures and supervised Bachelor's and Master's students

Education

Technische Universität Dresden (TU Dresden)

Dresden, Germany

PH.D. IN ELECTRICAL ENGINEERING

Feb. 2017 - Apr. 2022

- Dissertation: In-network Audio Processing for Low-latency Industrial Applications
- Final Grade: magna cum laude

Technische Universität Dresden (TU Dresden)

Dresden, Germany

MASTER OF SCIENCE IN COMPUTER SCIENCE

Apr. 2012 - Dec. 2016

- Master Thesis: Regenerating Codes
- Thesis Grade: 1.3

TUDIAS

Dresden, Germany

GERMAN LANGUAGE COURSE

Aug. 2011 - Mar. 2012

- Final Grade: DSH-2 (C1)

Chang'an University

Xi'an, China

BACHELOR OF SCIENCE IN COMPUTE ENGINEERING

Sept. 2007 - July. 2011

- Bachelor Thesis: Wireless Sensor Network
- Final Grade: A
